Course Overview

Angular Development Course Overview

The Angular Development course focuses on using modern Angular to develop Single-Page Applications (SPAs). This course teaches the use of Angular directives and expressions in HTML5 documents, and the writing of Angular components and services to build complete SPAs

This course covers Angular from Version 2 upwards, delivered using the latest version. TypeScript is used as the primary language and Microsoft Visual Studio Code together with Google Chrome as the development environment.

Exercises and examples are used throughout the course to give practical hands-on experience with the techniques covered.
