Prerequisites & Entry Requirements

General Prerequisites:

Candidates must hold the ITIL®4 Foundation Certificate.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

This course has been created to help IT service management practitioners working in organizations that are becoming more digitally enabled. The practitioners are familiar with traditional IT service management concepts, and now want to be able to discuss digital with more confidence, to develop practical competences, and to be valued contributors in the digital domain. They want to improve how they and their co-workers:

- Help get customers' jobs done helping customers become who they seek to become
- Keep raising the bar taking things to a significantly higher level
- Trust and are trusted as professional knowledge workers in a healthy workplace
- Accept ambiguity and uncertainty - not scared of not knowing an answer
- Commit to continual learning all as part of their daily work

The scope of the course is the primary activities in the digital value chain. In other words, what the practitioner does and which resources they use across the lifecycle of digital products, in order to:

- Make the right digital investments
- Realize and deliver digital products and services quickly
- Provide digital products and services that are highly resilient to disruption
- Ensure that the service consumer realizes value from the digital products and services
- Assure conformance of activities with governance, risk and compliance requirements.
