

Oracle 19c Database Backup and Recovery (TTOR21619)

Duration: 24.00 hours (3 days)

19.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Geared for DBAs and other technical support staff, Oracle Database 19c Backup and Recovery is a hands-on course that allows you to develop appropriate backup and recovery procedures to address their business model and requirements. Throughout the course you will explore how to implement basic backup and recovery procedures, move data between databases and files, and employ basic monitoring procedures. You will also learn how to secure the availability of a database by using appropriate backup and recovery strategies, how to perform backup and recovery operations using RMAN, and how to use Flashback features to recover from human error. This course combines expert lecture, real-world demonstrations and group discussions with machine-based practical labs and exercises. Working in a hands-on learning environment led by our expert facilitator, you will learn how to:

- Implement backup and recovery settings and perform backup operations to the media of your choice.
- Move data between databases and files
- Use Oracle Database recovery processes to recover from media and other failures.
- Diagnose and repair data failures
- Use flashback technologies and data duplication to complement backup and recovery procedures
- Secure the availability of their database using backup and recovery strategies
