

Salesforce Design and Build Integration Solutions (ARC101)

Duration: 24.00 hours (3 days)

19.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

Explore architectural concepts and the big picture thinking of how to integrate on the Salesforce Platform. In this 3-day class, our Salesforce integration experts will demonstrate how to build solutions that provide a single view of your customers. You'll learn about integration capabilities and the considerations that should be made when architecting an integration solution. Through a combination of demos, discussions, and hands-on exercises, you'll design and build secure, scalable, and high-performing integration solutions that seamlessly surface the information that matters most.

About This Course

Explore architectural concepts and the big picture thinking of how to integrate on the Salesforce Platform. In this 3-day class, our Salesforce integration experts will demonstrate how to build solutions that provide a single view of your customers. You'll learn about integration capabilities and the considerations that should be made when architecting an integration solution. Through a combination of demos, discussions, and hands-on exercises, you'll design and build secure, scalable, and high-performing integration solutions that seamlessly surface the information that matters most.

Who Should Attend

This class is designed for experienced administrators and platform developers as well as solution, enterprise, and technical architects responsible for designing or building integration solutions on the Salesforce Platform. It's also designed for project or program managers looking to understand the big picture of integration in order to better manage their projects and programs. Ideally, you hold the Salesforce Administrator, Salesforce App Builder, or Salesforce Platform Developer I credential and/or are knowledgeable about standard and custom objects; how to work with flows and Process Builder; how to navigate Salesforce, Lightning Components, and Schema Builder; and Apex basics such as creating a Class and Anonymous Blocks. This class is recommended for anyone looking to earn their Salesforce Certified Integration Designer credential.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

When you complete this course, you will be able to:

Identify integration requirements by asking relevant integration questions to business stakeholders.

Recommend appropriate integration patterns (Remote Process Invocation — Request and Reply, Remote Process Invocation — Fire and Forget, Batch Data Synchronization, Remote Call-In, and UI Update Based on Data Changes, Data Virtualization) to design integration solutions.

Recommend appropriate integration capabilities (SOAP, REST, bulk, streaming, Outbound Messaging, Callouts, and Salesforce Connect) to build integration solutions.
