

# Security in Google Cloud

**Category:** Security

**Duration:** 24.00 hours (3 days)

**19.5 CPD Hours**

**Rating:** ★ 4.6 (5,878 reviews)

## Course Information

**Delivery Format:** Instructor Led - Online

## Course Overview

This course gives participants broad study of security controls and techniques on Google Cloud Platform. Through lectures, demonstrations, and hands-on labs, participants explore and deploy the components of a secure Google Cloud solution. Participants also learn mitigation techniques for attacks at many points in a Google Cloud-based infrastructure, including Distributed Denial-of-Service attacks, phishing attacks, and threats involving content classification and use.

## About This Course

This course gives participants broad study of security controls and techniques on Google Cloud Platform. Through lectures, demonstrations, and hands-on labs, participants explore and deploy the components of a secure Google Cloud solution. Participants also learn mitigation techniques for attacks at many points in a Google Cloud-based infrastructure, including Distributed Denial-of-Service attacks, phishing attacks, and threats involving content classification and use.

## Who Should Attend

---

This class is intended for the following job roles:

[Cloud] information security analysts, architects, and engineers

Information security/cybersecurity specialists

Cloud infrastructure architects Additionally, the course is intended for Google and partner field personnel who work with customers in those job roles.

The course should also be useful to developers of cloud applications

# Learning Outcomes

---

**Upon successful completion of this course, participants will be able to:**

This course teaches participants the following skills:

Understanding the Google approach to security  
Managing administrative identities using Cloud Identity.

Implementing least privilege administrative access using Google Cloud Resource Manager, Cloud IAM.

Implementing IP traffic controls using VPC firewalls and Cloud Armor  
Implementing Identity Aware Proxy  
Analyzing changes to the configuration or metadata of resources with GCP audit logs

Scanning for and redact sensitive data with the Data Loss Prevention API  
Scanning a GCP deployment with Forseti  
Remediating important types of vulnerabilities, especially in public access to data and VMs

## Additional Course Details

---

Nexus Humans Security in Google Cloud training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the Security in Google Cloud course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.

Additionally, private sessions, closed classes or dedicated events are available both live online and at our training centres in Dublin and London, as well as at your offices anywhere in the UK, Ireland or across EMEA.

# Frequently Asked Questions

---
