

VMware Cloud Director: Install, Configure, Manage [v10.3]

Duration: 40.00 hours (5 days)

32.5 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Other

Course Overview

In this five-day course, you focus on installing, configuring, and managing VMware Cloud Director 10.3. You learn about workload provisioning, the creation of organizations, virtual data centers (VDCs), catalog services that include predefined virtual machines, and on-demand VMware NSX-T Data Center networks. This course also covers interfacing VMware Cloud Director with other systems and the integration and use of VMware vRealize Orchestrator for VMware Cloud Director. You learn about different networks that a system administrator and an organization administrator can configure and use with virtual machines (VMs). This course also discusses how to monitor various VMware Cloud Director objects using VMware vRealize Operations.

About This Course
