

VMware vSAN: Install, Configure, Manage [V8]

Duration: 32.00 hours (4 days)

26.0 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Other

Course Overview

During this course, you will gain the knowledge, skills, and tools to plan and deploy a VMware vSAN cluster. You will learn about managing and operating vSAN. This course focuses on building the required skills for common Day-2 vSAN administrator tasks such as vSAN node management, cluster maintenance, security operations, troubleshooting and advanced vSAN cluster operations. You will learn these skills through the completion of instructor-led activities and hands-on lab exercises.

About This Course

During this course, you will gain the knowledge, skills, and tools to plan and deploy a VMware vSAN cluster. You will learn about managing and operating vSAN. This course focuses on building the required skills for common Day-2 vSAN administrator tasks such as vSAN node management, cluster maintenance, security operations, troubleshooting and advanced vSAN cluster operations. You will learn these skills through the completion of instructor-led activities and hands-on lab exercises.

Who Should Attend

Storage and virtual infrastructure consultants, solution architects, and administrators who are responsible for production support and administration of VMware vSAN 8.0.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

By the end of the course, you should be able to meet the following objectives:

Describe vSAN concepts

Detail the underlying vSAN architecture and components

Explain the key features and use cases for vSAN

Identify requirements and planning considerations for vSAN clusters

Explain the importance vSAN node hardware compatibility

Describe the different vSAN deployment options

Explain how to configure vSAN fault domains

Detail how to define and create a VM storage policy

Discuss the impact of vSAN storage policy changes

Detail vSAN resilience and data availability

Describe vSAN storage space efficiency

Explain how vSAN encryption works

Detail VMware HCI Mesh™ technology and architecture

Detail vSAN File Service architecture and configuration

Describe how to setup a stretched and a two-node vSAN cluster

Describe vSAN maintenance mode and data evacuation options

Define the steps to shut down a vSAN cluster for maintenance

Explain how to use proactive tests to check the integrity of a vSAN cluster

Use VMware Skyline Health™ for monitoring vSAN health

Use VMware Skyline Health to investigate and help determine failure conditions

Discuss vSAN troubleshooting best practices

Describe vSAN Express Storage Architecture™ concepts

Additional Course Details

Nexus Humans VMware vSAN: Install, Configure, Manage [V8] training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the VMware vSAN: Install, Configure, Manage [V8] course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.

Additionally, private sessions, closed classes or dedicated events are available both live online and at our training centres in Dublin and London, as well as at your offices anywhere in the UK, Ireland or across EMEA.
