

WM153 IBM MQ V9 System

Administration (using Windows for labs)

Duration: 32.00 hours (4 days)

26.0 CPD Hours

Rating: ★ 4.6 (5,878 reviews)

Course Information

Delivery Format: Instructor Led - Online

Course Overview

This course provides technical professionals with the skills that are needed to administer IBM® MQ queue managers on distributed operating systems and in the Cloud. In addition to the instructor-led lectures, you participate in hands-on lab exercises that are designed to reinforce lecture content. The lab exercises use IBM® MQ V9.0, giving you practical experience with tasks such as handling queue recovery, implementing security, and problem determination. Note: This course does not cover any of the features of MQ for z/OS or MQ for IBM® i.

About This Course

This course provides technical professionals with the skills that are needed to administer IBM® MQ queue managers on distributed operating systems and in the Cloud. In addition to the instructor-led lectures, you participate in hands-on lab exercises that are designed to reinforce lecture content. The lab exercises use IBM® MQ V9.0, giving you practical experience with tasks such as handling queue recovery, implementing security, and problem determination.

Note: This course does not cover any of the features of MQ for z/OS or MQ for IBM® i.

Who Should Attend

This course is designed for technical professionals who require the skills to administer IBM® MQ queue managers on distributed operating systems, in the Cloud, or on the IBM® MQ Appliance.

Learning Outcomes

Upon successful completion of this course, participants will be able to:

After completing this course, you should be able to:

- Describe the IBM® MQ deployment options
- Plan for the implementation of IBM® MQ on-premises or in the Cloud
- Use IBM® MQ commands and the IBM® MQ Explorer to create and manage queue managers, queues, and channels
- Use the IBM® MQ sample programs and utilities to test the IBM® MQ network
- Enable a queue manager to exchange messages with another queue manager
- Configure client connections to a queue manager
- Use a trigger message and a trigger monitor to start an application to process messages
- Implement basic queue manager restart and recovery procedures
- Use IBM® MQ troubleshooting tools to identify the cause of a problem in the IBM® MQ network
- Plan for and implement basic IBM® MQ security features
- Use accounting and statistics messages to monitor the activities of an IBM® MQ system
- Define and administer a simple queue manager cluster

Additional Course Details

Nexus Humans WM153 IBM MQ V9 System Administration (using Windows for labs) training program is a workshop that presents an invigorating mix of sessions, lessons, and masterclasses meticulously crafted to propel your learning expedition forward.

This immersive bootcamp-style experience boasts interactive lectures, hands-on labs, and collaborative hackathons, all strategically designed to fortify fundamental concepts.

Guided by seasoned coaches, each session offers priceless insights and practical skills crucial for honing your expertise. Whether you're stepping into the realm of professional skills or a seasoned professional, this comprehensive course ensures you're equipped with the knowledge and prowess necessary for success.

While we feel this is the best course for the WM153 IBM MQ V9 System Administration (using Windows for labs) course and one of our Top 10 we encourage you to read the course outline to make sure it is the right content for you.

Additionally, private sessions, closed classes or dedicated events are available both live online and at our training centres in Dublin and London, as well as at your offices anywhere in the UK, Ireland or across EMEA.
